

This exam is divided up into two parts, multiple choice and short answer questions. All work must be shown in order to receive full credit. Please turn off all electronic communication devices.

Multiple choice questions: Choose the correct answer and record it on the scantron provided (2 points each).

Name Key (Last)
 (First)
 BOO# _____

1. Which of the following is/are primary (1°) alcohols?

- (a) only 1
 (b) only 3
 (c) only 1 and 3
 (d) only 2, 3 and 4

2. Which of the following has the highest boiling point?

- (a) 1-butanol
 (b) 2-butanol
 (c) *tert*-butyl alcohol
 (d) 1,4-butanediol

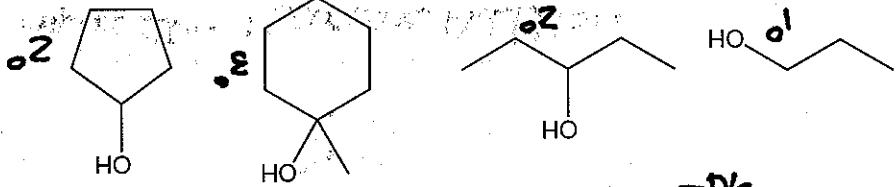

most H-bonding

3. Which of the following alcohols reacts fastest with HBr to give the corresponding alkyl bromide?

- (a) methanol
 (b) ethanol
 (c) 2-propanol
 (d) 2-methyl-2-propanol

Sol: stable C^+

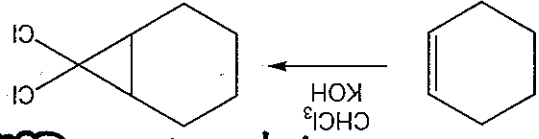

4. Which of the following alcohols reacts fastest with HBr to give the corresponding alkyl bromide?

5. What type of reactive intermediate is formed in the reaction of *tert*-butyl alcohol with HCl to give *tert*-butyl chloride?

- (a) *tert*-butyl radical
 (b) *tert*-butyl anion
 (c) *tert*-butyl cation
 (d) *tert*-butoxide

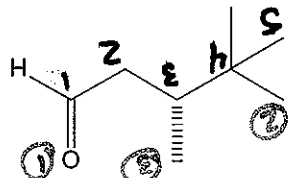

- (a) dichlorocarbene (Cl_2C)
- (b) the trichloromethyl cation (Cl_3C^+)
- (c) the cyclohexyl carbocation
- (d) the cyclic chloronium ion derived from cyclohexene

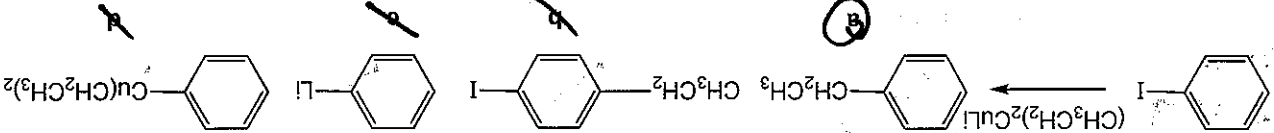

Alpha Elim: Carbene Addition

11. What reactive intermediates are involved in the following reaction?

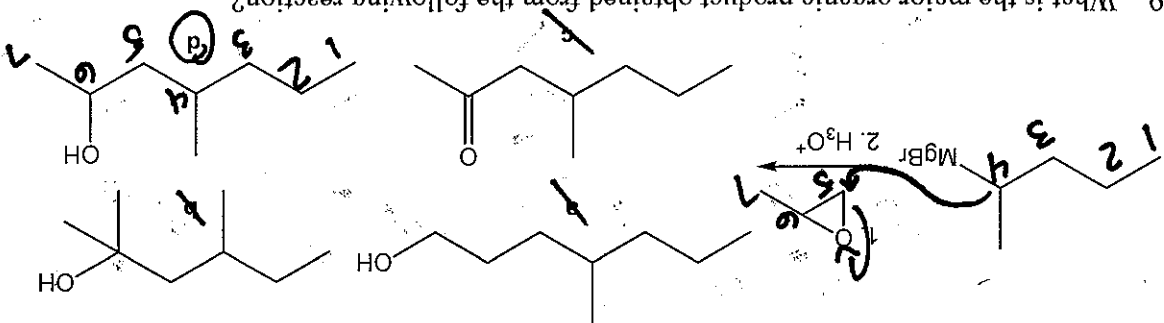

- (a) (S)-3,4,4-trimethylpentanal
- (b) (R)-3,4,4-trimethylpentanal
- (c) (R)-3-tert-butylpropanal
- (d) (R)-3-tert-butylbutanal

10. What is the IUPAC name of the following compound?

9. What is the major organic product obtained from the following reaction?

8. What is the major organic product obtained from the following reaction?

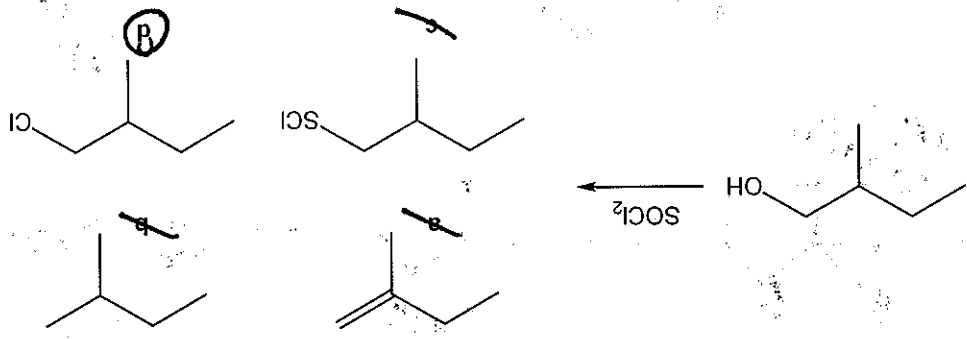

- (a) water
 - (b) methanol
 - (c) diethyl ether
 - (d) acetic acid
- Grignard**

7. Which of the following is the best choice of solvent for the formation of phenylmagnesium bromide by the reaction of bromobenzene with magnesium?

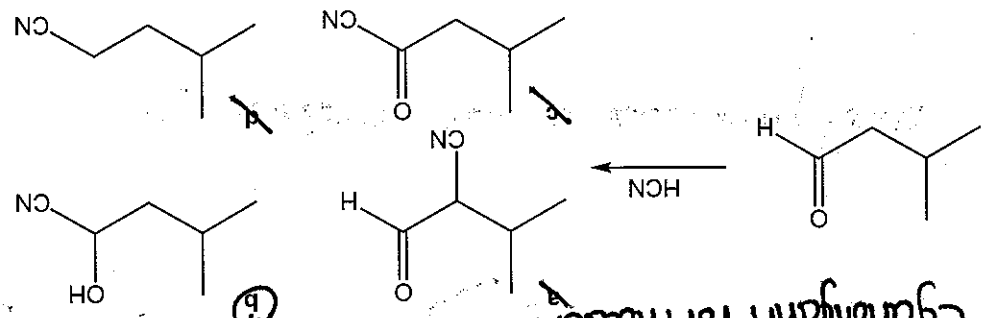

- (a) 2-iodo-2-butene
- (b) 1-iodo-2-methylpropene
- (c) methylcyclopropane
- (d) 2-butene

6. What is the major organic product obtained from the following reaction?

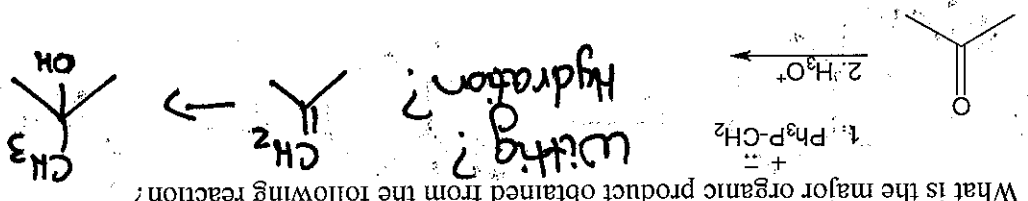

15. What is the major organic product obtained from the following reaction?

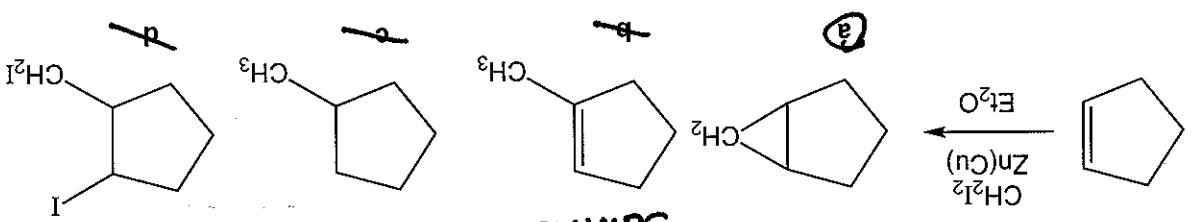

14. What is the major organic product obtained from the following reaction?

- (a) 1-butene (b) 2-butene (c) 2-methylpropene (d) 2-methyl-1-propanol

13. What is the major organic product obtained from the following reaction?

12. What is the major organic product obtained from the following reaction?

Asking Dr. Veldu *

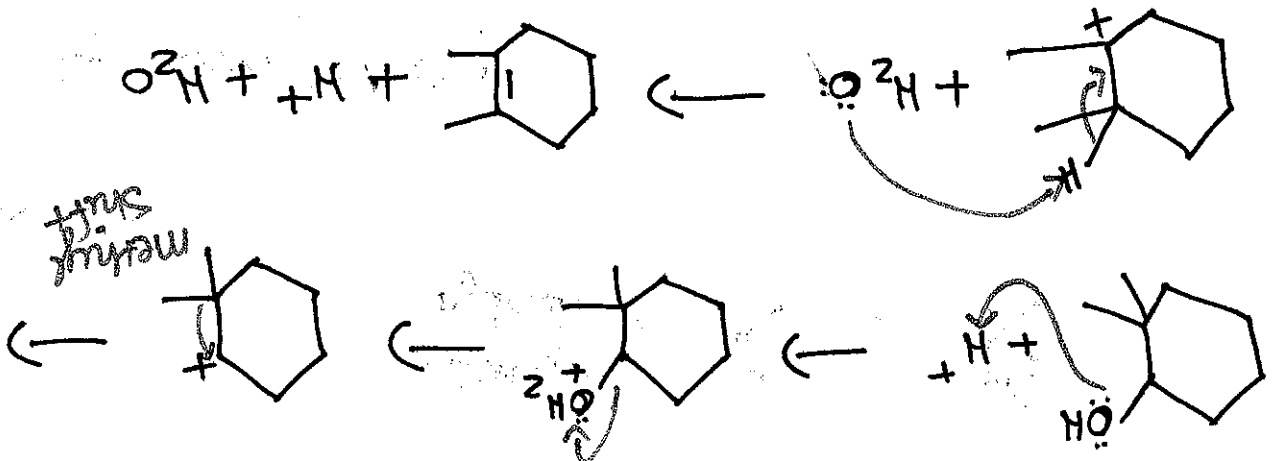

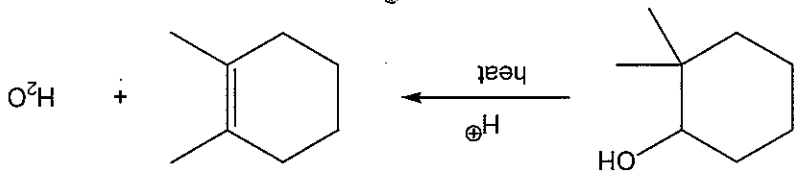

Hydration? with?

Simmons Smith: Carbene Addition

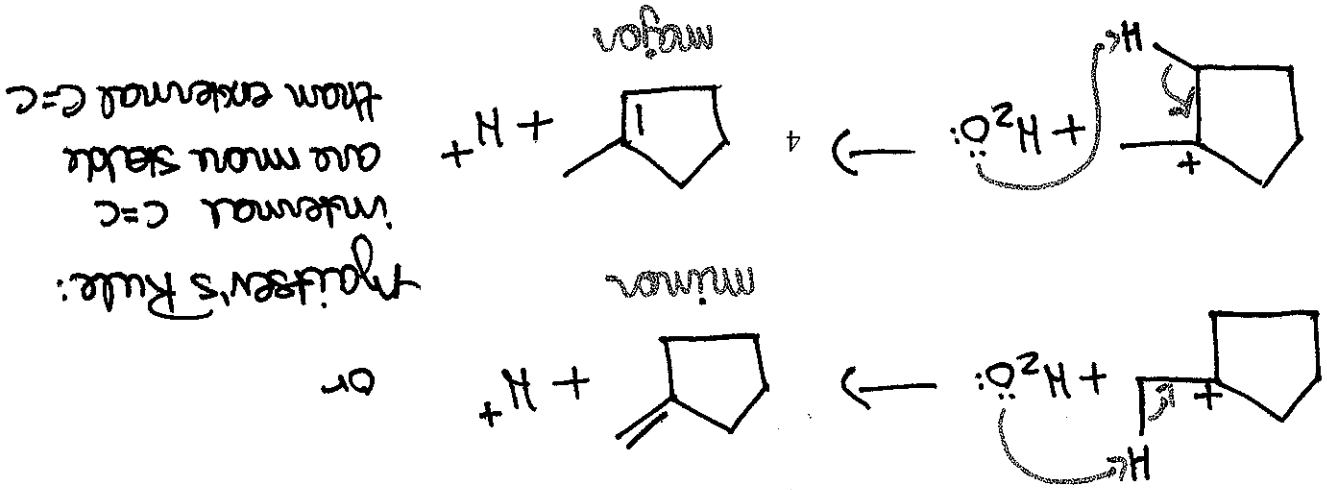

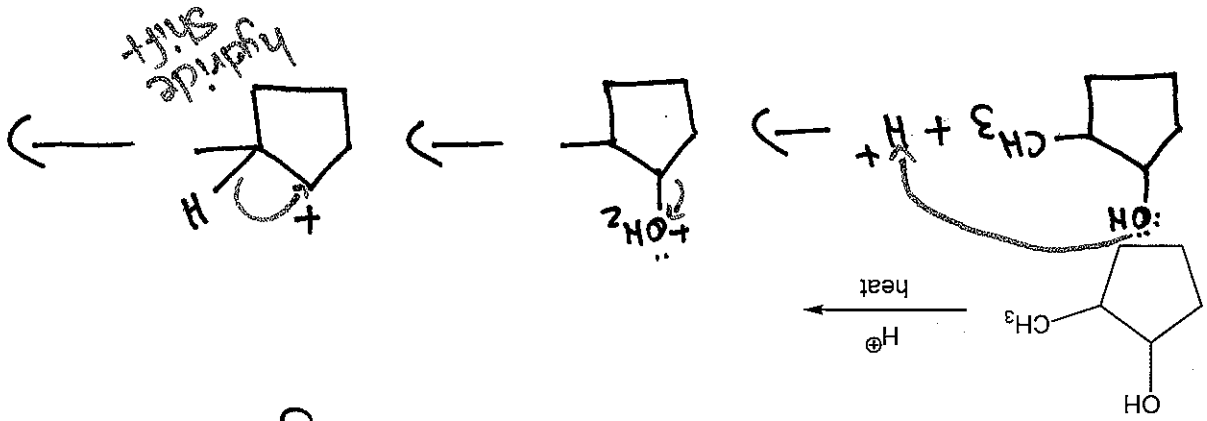

Short answer questions.

π -e⁻ movement

1. Propose a mechanism to account for this acid catalyzed dehydration. All electron movement must be indicated by arrows (10 points).

2. Draw the structural formulas for the alkenes formed on acid catalyzed dehydration of 2-methylcyclopentanol. Identify the major product and give reasons for this being the major product (10 points). Mechanism was unnecessary here

Major product

minor

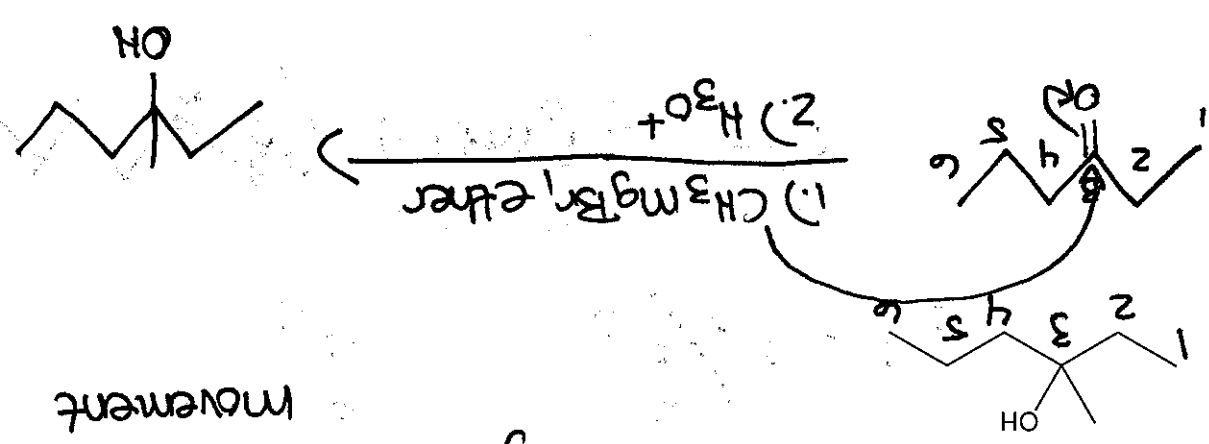

hydride shift

internal C=C
are more stable
than external C=C

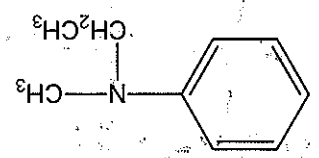

or

Major product

3. Suggest a synthesis for the following tertiary alcohol starting from a ketone and Grignard reagent (10 points).

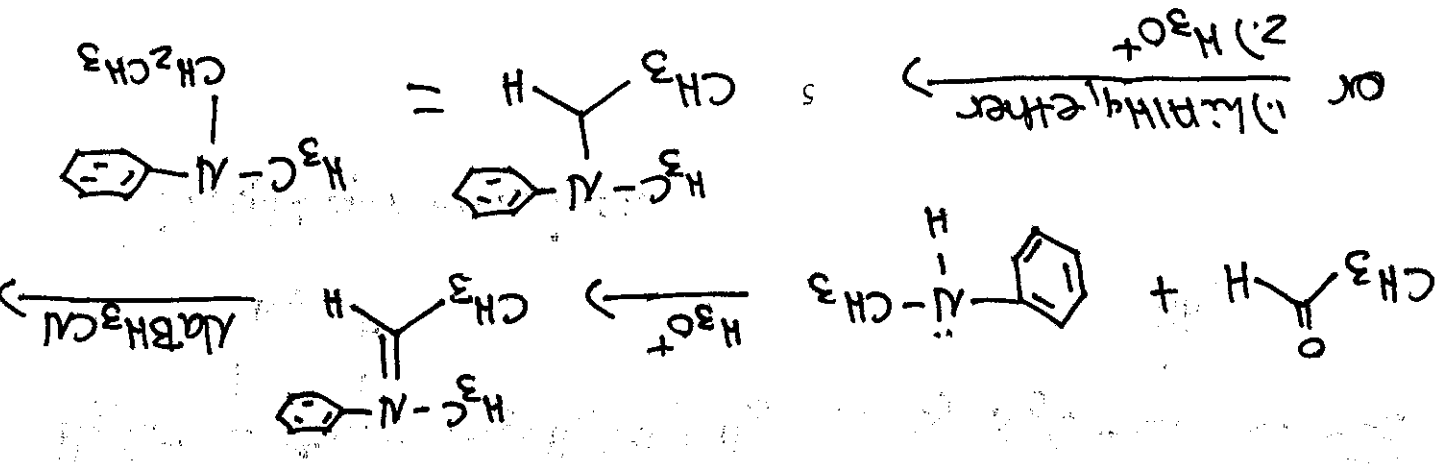

4. Propose a synthesis of the following tertiary amine using a reductive amination reaction (10 points).

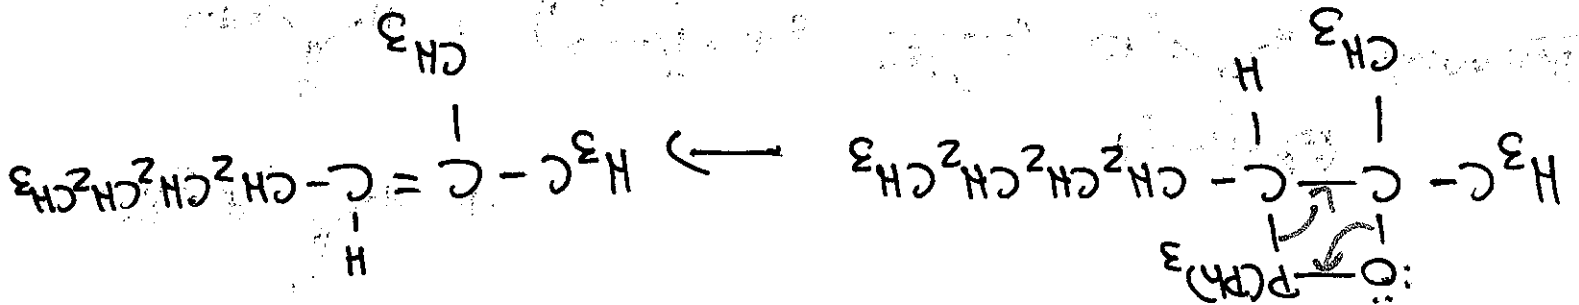

1 way to make a 3° amine
at this point
Reduce Enamine

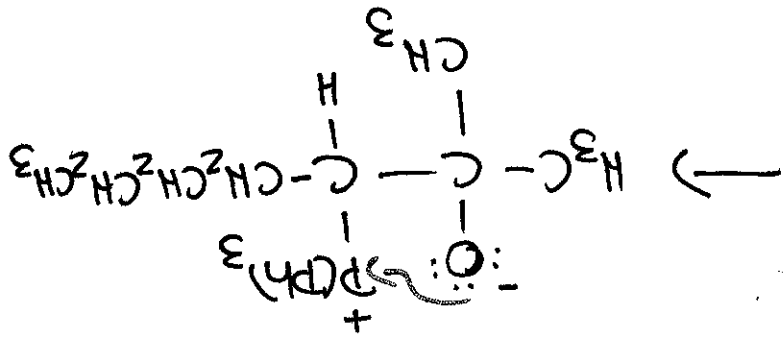

1 way to make enamine
Ketone or aldehyde + 2° amine

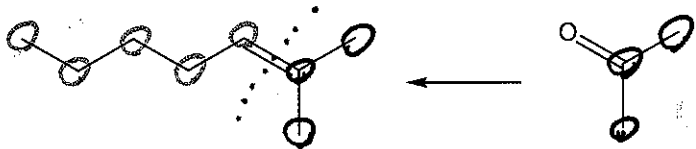

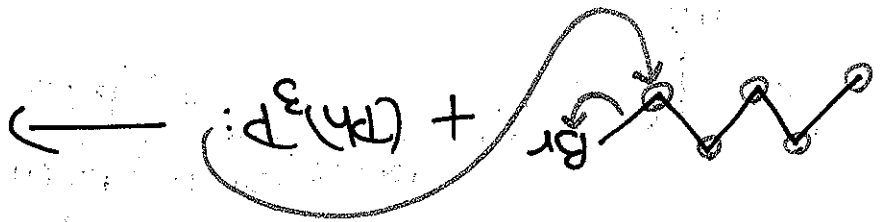

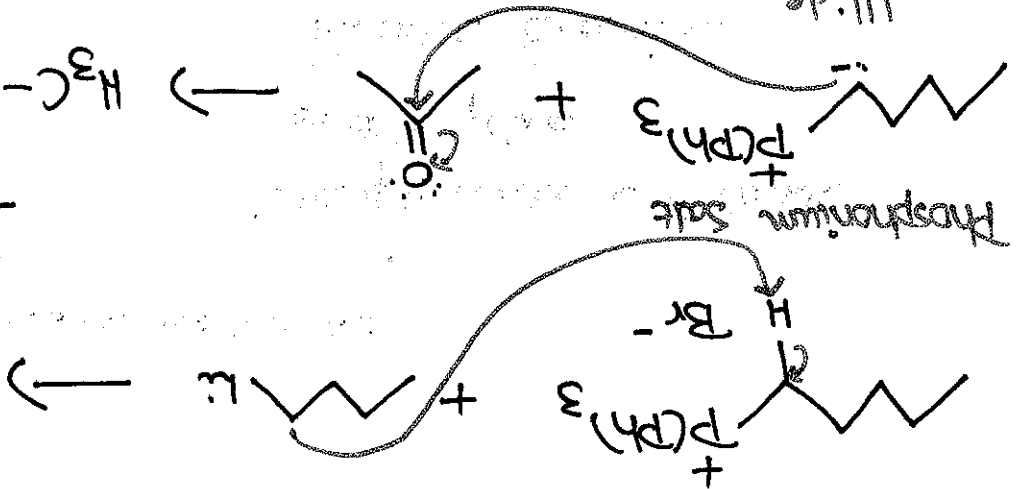

Oxaphosphetane int.

Betaine int.

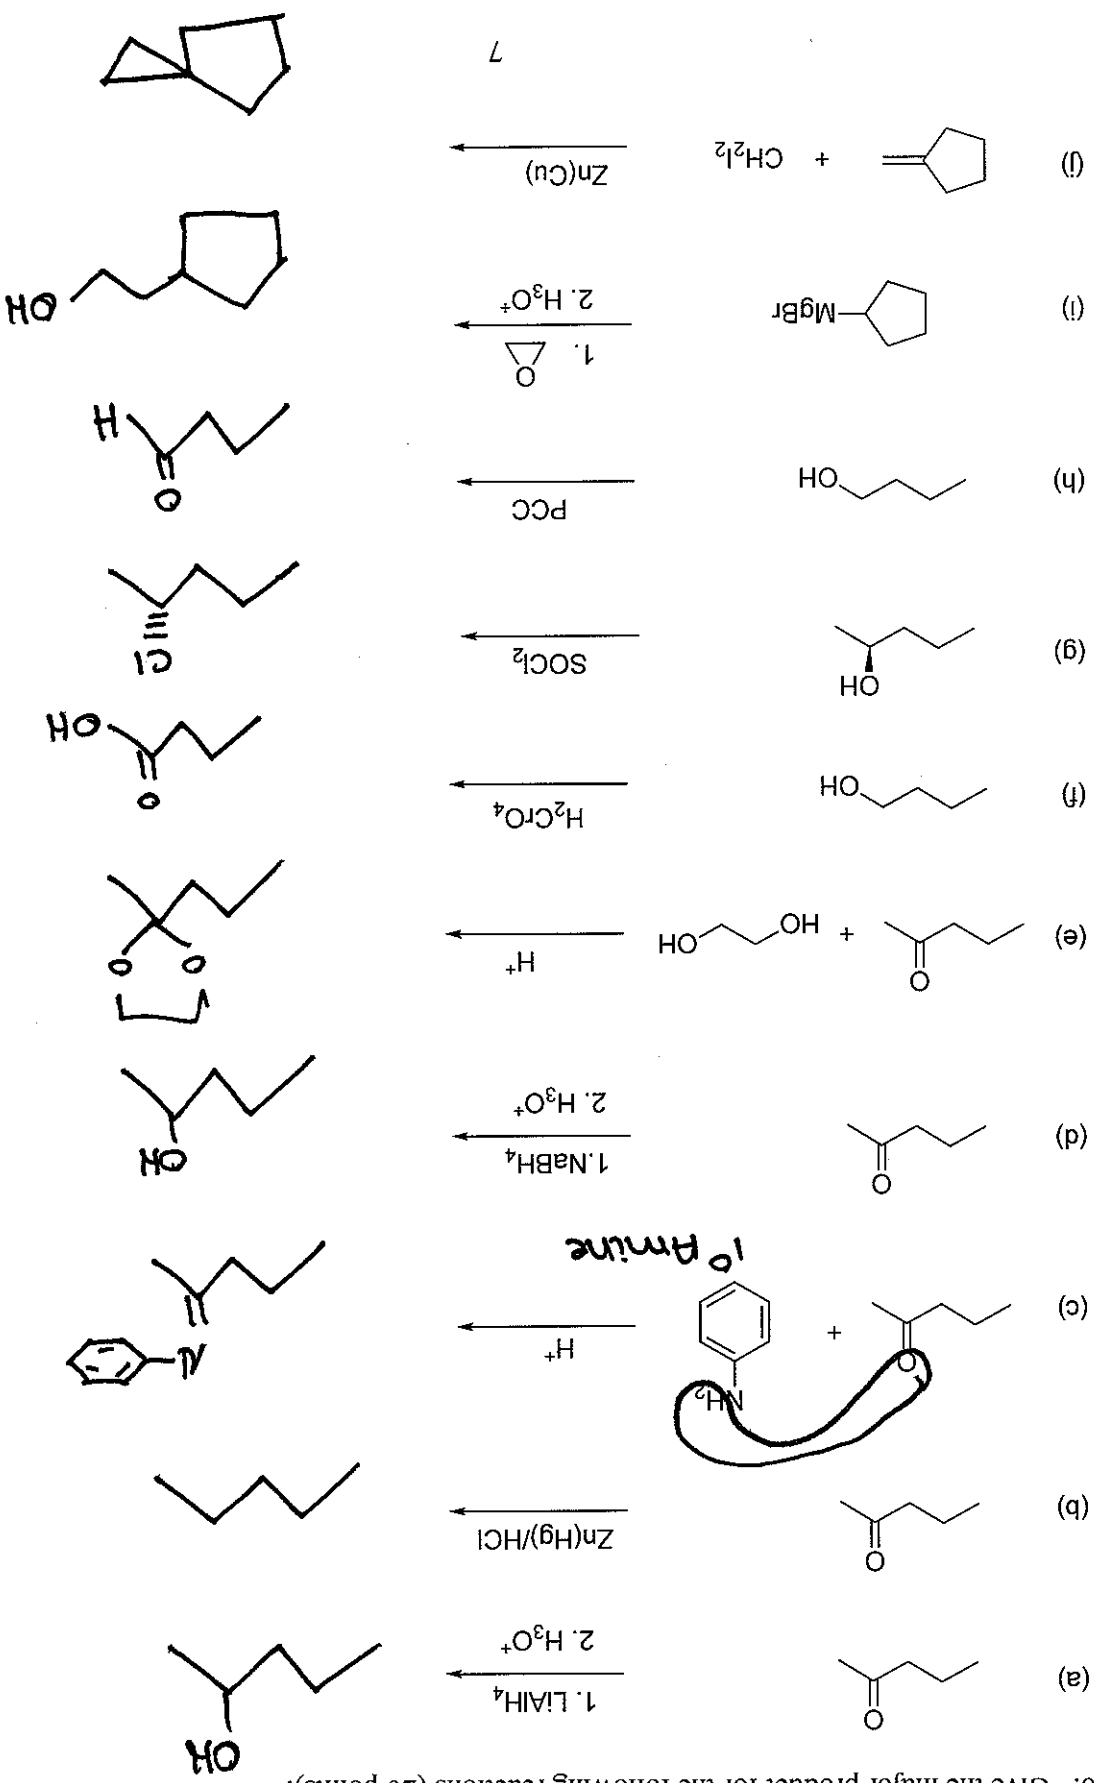

ylide

5. Show how to bring about the following conversion using a Wittig reaction (10 points). (Formation of Phosphonium salt and Ylide as intermediate products must be clearly shown).

6. Give the major product for the following reactions (20 points).

10

11

12

13

14

15

16
